SUNDAY'S READING: WORSHIP BOOK #1163

BUILDING FOR THE COMMON GOOD

Part 2 of the Pope's Encyclical:

11. Building a city founded on the common good implies, first and foremost, building on a firm relationship with God. It means recognizing that the truth of his love calls us to life "in all its fullness" (Jn 10:10) and communion with him. Like Saint Augustine, we too can say, "You have made us for yourself, O Lord, and our heart is restless until it rests in you." [8] Indeed, God has inscribed in our hearts a desire for happiness that embraces all the dimensions of life. The Church, in dialogue with the men and women of our time, recognizes the urgent need to safeguard and guide this aspiration toward its deepest truth.

12. Secondly, building for the common good means accepting the limits and weakness of humanity without considering them an error to be corrected. Today, the human desire for fullness of life is at risk of being misled by deceitful goals, such as the prospect of a technology that promises to free us from all weakness, and models of wellbeing that leave behind entire populations. All too often, we place our hope in unlimited "upgrades," in forms of progress that exacerbate inequalities, and in immediate solutions incapable of healing people's wounds. As a result, while some pursue the illusion of unlimited self-assertion, many are deprived of basic necessities. The Church reminds us, with a firm yet humble voice, that true fulfilment is not achieved by eliminating weakness but through harmonious growth. It is found where freedom and responsibility are intertwined with mutual care and true solidarity, and where progress is measured by the dignity of each person and the good of all peoples.

13. Thirdly, building a world in which everyone can flourish requires shared responsibility and courage. No one can single-handedly bear the weight of the challenges the world is facing, just as no one is so weak that they cannot play their part, for "power is made perfect in weakness" (2 Cor 12:9). All are given their own section of the wall: scientists and researchers, entrepreneurs and workers, educators and legislators, civil society, popular movements and faith communities. This is the logic of subsidiarity, which values the cooperation between generations, peoples, disciplines and cultures as the best way for fostering stability, prosperity and peace. We should not be intimidated by tensions or differences because they can become creative forces when guided by shared responsibility.
